Happy New Year!

Welcome to 2015! As we usher in a new year, we are winding down the first semester. At St. Benedict's, this means that students *and staff* are working hard to ensure assignments are done, and students have the tools they need to succeed.

Hopefully, part of your son's or daughter's new year's resolutions will be to not just survive, but also thrive while at school; to do so not just intellectually, but also emotionally and spiritually. School is more than absorbing information, it is a place to experience growth and gathering of tools which will prepare students to face the world as conscientious, intelligent, and respectful members of society.

Haven't made a resolution yet? It's never too late, and you can start any time. What are mine, you ask? Make more time for family and friends. Continue to serve my community (school and parish). Do more crossword puzzles (flex that mental muscle!!). And to never, ever stop learning. How about you?

Best of luck to all our students as they approach the end of the semester. We hope you will be proud of all of your accomplishments, and you do your best on your exams! Resolve to succeed!

St. Benedict is a satellite location for Canada AM January 27th

BY MR. D. WITT

The Semi-Final voting for The AVIVA Community fund campaign closed in December with our “Heart of the Community” Project finishing fourth in the voting. The votes are one part of the overall judging of the proposals. We have been notified that we are one of the Finalists still being considered for the \$100,000 Grand Prize. As such we will be one of a number of satellite sites hosting the Canada AM show on Tuesday January 27th from 6 to 9 a.m. in the morning at our school. It is important to understand that we are still one of a number of finalists. The winners will be announced on that day.

Tuesday January 27th happens to be our period 3 exam day. Because of the Canada AM show, exams will be delayed until 11:30 on that day. Canada AM is a nationwide morning show on CTV which

will be bringing positive media to both St. Benedict and the city of Cambridge on that day. Win or lose we want the morning to be a great celebration of our school and our Cambridge community so students, parents and staff are all invited to join us for this event. More details will be announced as we get closer to the day.

Please note with the exams starting at 11:30 on that day, Students who are bussed will have their runs pick them up 3 hours and 15 minutes later than their normal morning pick up time for arrival at school somewhere around 11:00. All students will be required to be in their class for the full 2 hour exam time from 11:30 to 1:30. Busses will depart at 2:00 on that day. Please keep sending those positive vibes for the success of our "Heart of the Community" Project.

App Development gives students some real life experiences

By MR. A. MILARDOVIC

On Friday, January 9, Mr. Milardovic's grade 11 computer programming/computer science class got to attend a special party at the Board Office. They were celebrating the launch of their apps as part of the Apps4Learning program, which they had spent the last several weeks developing.

The programmers developed apps for Ms. Figueiredo's grade 6 class at St. Joseph's elementary school. The students (whom we referred to as the *clients*) came up with ideas for apps based on the grade 6 curriculum. The grade 11 students (referred to as the *developers*) used the clients' ideas, questions, and overall vision to then design the app.

Students enjoyed the real world experience and got an opportunity to work as part of a team to create a finished product.

Students learned very quickly that app development is not simply a matter of sitting at a computer and coding—there was a lot of consultation with the client (analysis), planning on paper (design), and only after the client approved the mock up and paper plans was the computer used as a tool in the development process. Students designed graphics, backgrounds, and buttons, and then subsequently linked the pages of their apps to provide users with feedback and direction.

After several consultations between October and December, the students got the opportunity to show off their apps, and see those created by classes from the other four high schools in our Board in consultation with an elementary school class. A lot of the students received compliments for their apps, and many enjoyed showing theirs off. Students also used the time to talk to students from the other high schools to see what they had developed.

As a teacher, I was very pleased to have had my class selected to be a part of Apps4Learning, and I enjoyed working not only with my students but also with the students from St. Joe's on this project. Students enjoyed the real world experience and got an opportunity to work as part of a team to create a finished product. They got to deal with decision making, consensus building, compromise, and dealing with limitations with hardware, software, resources, and time.

It took a lot of people to put the Apps4Learning program together, we thank Mr. Rob Holowack from the Board Office for all his work, as well as the Business & Education Partnership and Junior Achievement for their time, resources and support. And finally, a big thank you to the LiveApp team for donating space on their server for our projects!
